

Warm Up 1/31/17

LT: Graph tangent and cotangent functions and their transformations

Part II: Cotangent

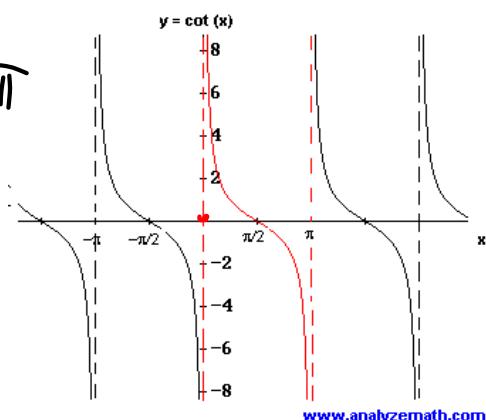

- ★ 1 Period is π
- ★ Graph 2 Periods (determines interval)

Let's Graph $f(x) = \cot x$

Amp = 1 $0, \frac{\pi}{2}, \pi, \frac{3\pi}{2}, 2\pi$
 $2\text{Per.} = 2\pi$

Int. = $\frac{\pi}{2}$ ADADA

V.S. & H.S. = None

Ex 4) Graph 2 periods of: $f(x) = \cot\left(\frac{x}{2}\right) + 4$

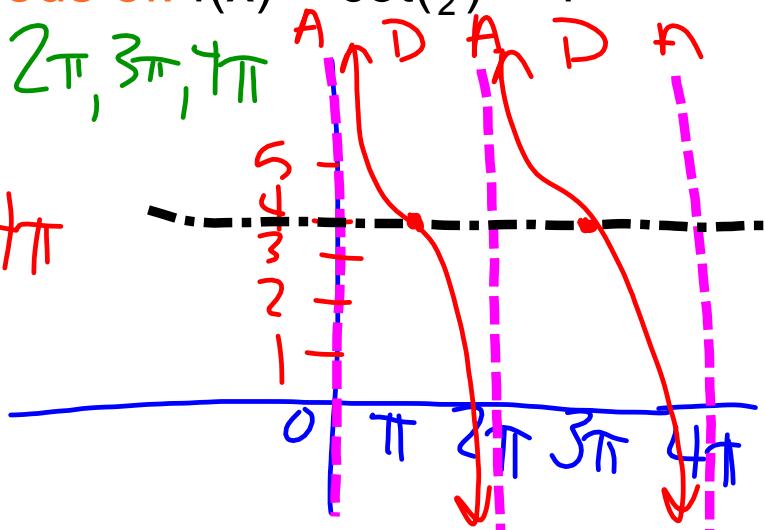

$$\text{Amp} = 1 \quad 0, \pi, 2\pi, 3\pi, 4\pi$$

$$2\text{Per.} = 2\pi \cdot \frac{2}{1} = 4\pi$$

$$\text{Int.} = \pi$$

$$\text{V.S.} = +4$$

$$\text{H.S.} = 0$$

Ex 5) Graph 2 periods of: $f(x) = 3\cot\left(\frac{1}{4}x\right) - 2$

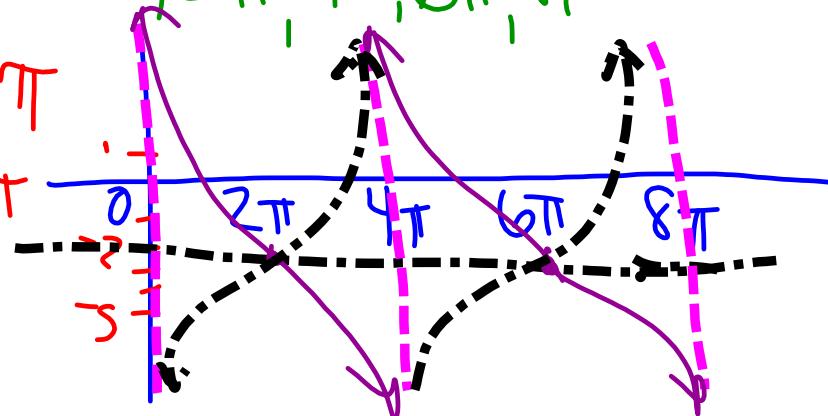

$$\text{Amp} = 3 \quad 0, 2\pi, 4\pi, 6\pi, 8\pi$$

$$2\text{Per.} = 8\pi$$

$$\text{Int.} = 2\pi$$

$$\text{H.S.} = 0$$

$$\text{V.S.} = -2$$

Ex 6) Graph 2 periods of: $f(x) = -\cot(2x + \frac{\pi}{2})$

$$\text{Amp} = 1 \quad -\frac{\pi}{4}, 0, \frac{\pi}{4}, \frac{\pi}{2}, \frac{3\pi}{4}$$

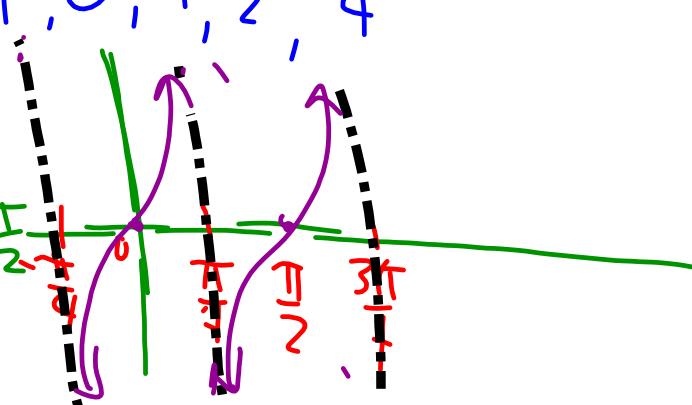

$$2\text{Per} = \pi$$

$$\text{Int.} = \frac{\pi}{4}$$

$$\text{H.S.} \Rightarrow 0 = 2x + \frac{\pi}{2}$$

$$2x = -\frac{\pi}{2}$$

$$x = -\frac{\pi}{4}$$

Ex 7) Graph 2 periods of: $f(x) = -2\cot(\frac{1}{4}x + \frac{\pi}{8})$
